Power Supplies

Globtek designs, engineers and manufactures linear and switching power supplies for ITE or medical applications as standard models, or modified and customized to customers' specific requirements. GlobTek power supplies are available in desktop, wall plug-in and open frame form factors. Standard products are certified with UL, cUL/CSA, VDE, TUV, CE, & T-Mark approvals. Most models participate in the CB-Scheme to accommodate further global certification if required. Energy Star, RoHS and LEVEL V designs are also available for applications from gym equipment to medical systems. GlobTek's modern facilities host production projects from large OEM runs to small lots for special applications.

Use Globtek's power supply selector to search our complete line of power supplies to fit your requirements, or browse the full spec chart for ITE power supplies or Medical power supplies.

Globtek power supplies fulfill power requirements ranging from 5 watts to 2 kilowatts. With a 5-year warranty on all products, Globtek power supplies are among the most reliable. A Made in USA option is available upon request for all Globtek's power supplies.
